

Company and background (10 points):

- Did you identify the company?
- Did you provide information about the company's main line of business?
- Did you detail the size of this company?

AI Strategy (15 points):

- Did you explain what AI might be deployed for, exactly?
 - That is, did you state what specific predictions / judgements AI might be used to automate?
- Did you detail where the data to implement this AI would come from, exactly?
- Did you detail a timeline for implementation, and who would be required (what roles / skills) to make this happen at the company?
 - E.g., pilot project of form A, followed by broader implementation, etc.
- Did you provide any other implementation details?

Feasibility, i.e., Legally, Technically, Economically (10 points):

- Is it legal?
- Is this something that current technology is likely capable of?
- Is this likely to be revenue-generating and/or cost saving?
- Did you think about what data would be needed and where it would come from?
